

UGC: which doors open at 1k?

Ease of entry - 4 October 2026

Your evidence: 1,000 followers; 500k total impressions as reported; LinkedIn ~180k views and YouTube ~270k views. The follower platform and current engagement/average-view figures are not established.

Tier 1: 8 | Tier 2: 105 | Tier 3: 27 | Total: 140

Lead with this

1. The UGC Agency

Lead with 500k total impressions, including ~180k LinkedIn and ~270k YouTube views; offer two short AI-tool demos. No floor, optional portfolio, UK route. Label: 18+.

2. TapLab

Lead with 500k total impressions and two phone-shot AI/product demos for brand-owned channels; no personal posting needed. UK-focused. Age unspecified for UGC.

3. Ask Maeve

Lead with 500k total impressions and ~270k YouTube views as short-video craft proof; show one honest student-study demo. No prior following/experience needed. 16-17 included; guardian terms unclear.

4. Growpins

Lead with 500k total impressions, especially ~180k LinkedIn views, plus one clear AI-app concept. No audience minimum. Conditional: UK/age not stated in the seed.

5. GenieAI

Lead with 500k total impressions and ~180k LinkedIn views; pitch a careful legal-AI workflow demo and seek concept approval before filming. Craft-screened. Conditional: UK/age unspecified.

How this ranking works

Re-sorted from the supplied 4 October master only. Links, rates, deadlines and source caveats have not been re-checked. All 140 original programme rows are retained exactly once; the appendix remains outside that count.

Ease means the documented entry hurdle, not a measured acceptance rate. No programme publishes enough evidence here to promise admission, feedback, a reply, or paid work. Within each tier, low-screening and relevant AI/UGC routes come first; this is not a pay ranking.

Age is a label only, never a ranking penalty, following your latest instruction. An 18+ label still means that route does not currently establish eligibility for a minor. Unspecified never means under-18 approved.

Tier 1: no documented numerical floor, UK-facing/UK allowed or no restriction found, low-screening content-led entry. Lead with the 500k total proof point, then the best relevant sample. Tier 2: samples, pitch, certification, portfolio review, borderline met criteria, unknown requirements or region caveats. Good odds applies only after each stated condition is met. Some are explicitly not UK-ready.

Tier 3: unmet audience floors, heavy recurring output, enrollment not established, or a substantial promotional burden. These are different blockers, stated in each row. 18+ alone never causes Tier 3.

LinkedIn/YouTube views support craft and reach, not TikTok/Instagram followers, subscribers, current average views, audience geography or likes. Do not silently treat the 1k follower figure as YouTube subscribers or IG/TikTok followers. Use real screenshots and the relevant platform breakdown.

For low-stakes feedback, submit an existing sample where possible. Do not buy products, paid memberships or create unpaid custom work merely to qualify. Agree pay, rights, revisions, exclusivity, guardian/contract terms and payout in writing before accepting work.

Upcoming dates carried from source: LilysAI cohort 8 October 2026; Triplespeed US casting 19 October 2026. Neither deadline fixes enrollment or country restrictions.

soona and Trend are one network, counted once. Billo, Cohley, Speakly, Insense, Twirl, JoinBrands, Influee, The UGC Agency appeared in both marketplace slices and are merged. CapCut UK Template, Ask Maeve, LilysAI, Knowunity, Lindy appeared in more than one slice and are merged (conflicting age statements are shown in the row).

Slice authors note several fetched pages carried text aimed at AI agents; none of it was followed.
